

HOW TO PATCH A SMALL HOLE IN YOUR POOL COVER

HOLES, TEARS AND PINHOLES

BY: COVERPRO

1. Move cover so area to be patched is resting on your deck rather than the water.
2. Clean around the patch area with a wet cloth and let dry before patching.
3. Cut your specific size in a circle or football shape rather than a square. (Rounded edges will help prevent the patch from pulling up.)
4. Place the patch over the tear and outline it with a pencil.
5. Apply Vinyl Pool Patch Glue to the rough side of the patch, also apply glue to the cover within the penciled outline.
6. Allow some time for the adhesive to become tacky then press patch on damaged area for approximately 3 minutes. (Make sure to keep smooth side of the vinyl on top)
7. Allow 4-8hours dry time before operating the cover.
8. When patching a pinhole, apply Vinyl Pool Patch Glue directly to the pinhole.
